Project Ideas

1. Language Learning Application

A language learning application or a platform for users to exchange and learn about different cultures and languages. A lot of different topics can be included such as food, music, wedding, etc.

2. Music Gig / Art Commission Application

Artist/musicians/bands and venues/businesses/individuals can search for and contact each other for art commissions or to play shows. There could be a rating system, musicians and artists could upload examples of their work, maybe could even make payments through the web app.

3. Local Afterschool/Homeschool programs for K-12

An website/Application help to gather and post related information and match the activities with students time.
